*Despite their enormous economic importance, M&A contracts are largely neglected by legal academia. For this reason, a discussion around Stefan Korch's book ("Unternehmenskaufverträge", Mohr Siebeck, Tübingen, 2024), seems useful and stimulating for all those interested in this specific area of contract law. The author analyses the law in action, laying the theoretical foundations for a better understanding of the M&A practice. He thereby also contributes to the evolving body of literature on the drafting and evolution of contracts and contract design in general.*
